

INTRODUCTION	9
CHAPTER I HIGH ENERGY PHISICS PROJECTS	14
1.1. Large Hadron Collider.....	16
1.2. International Thermonuclear Experimental Reactor.....	19
1.3. Facility for Antiproton and Ion Research.....	22
1.4. High Energy Physics and Technology Innovations.....	23
1.5. GRID.....	27
CHAPTER II ATLAS EXPERIMENT	33
2.1. Inner Detector.....	36
2.2. Calorimeters.....	40
2.3. Magnet System.....	45
2.4. Muon System.....	47
CHAPTER III ENGINEERING TASKS IN ATLAS EXPERIMENT	53
3.1. Construction of Detector.....	53
3.2. Data Acquisition.....	56
3.3. Database Organization.....	57
3.4. Reconstruction.....	61
3.5. Simulation.....	63
3.6. Geometry Modeling of Detector.....	68
3.7. Setting up Research Problem and Working Plan.....	73
CHAPTER IV CONSIDERATION OF COIL GEOMETRY AND MASS PROPERTIES	76
4.1. Reproduction of Coils Geometry in CATIA.....	76
4.2. Segmentation and Definition of Mass Properties.....	90
4.2.1. VOL. 1: Cryostat Top.....	90

4.2.2. VOL.2, 4, 6, 8: Cryostat Corner.....	91
4.2.3. VOL.3, 7: Cryostat Sides.....	92
4.2.4. VOL.5: Cryostat Bottom	93
4.2.5. VOL.9: Voussoirs	94
4.2.6. VOL.10: Steffeners.....	95
4.2.7. VOL.10: Ribs.....	96
4.2.8. VOL.12: Thermal Shielding	97
4.2.9. VOL.13: Tie Rod	97
4.2.10. VOL.14: Casing.....	99
4.2.11. VOL.15: Casing Part	100
4.2.12. VOL.16: Coils.....	100
4.2.13. VOL.17: Services	101
4.2.14. VOL.18: Service Support	103
4.2.15. VOL.19: Fasteners	104
4.2.16. VOL.20, 21: Ribs of Thermal Shielding and Casing	105
4.3. Compare Analysis of Models	107

CHAPTER V **SIMPLIFICATION OF GEOMETRY AND GEANT4/C++**

PROGRAMMING	118
5.1. Simplification of Geometry	118
5.2. Preparation of Geant4/C++ Code	135
5.2.1. Development of Method for Conflicts Checking	137
5.2.2. Programming of Coil Segments	148
CONCLUSIONS	172
REFERENCES	173
ANNEX	176
