ATLAS - EC Toroid Installation

REPORT

of Dynamical Conflict Checking

Done by: Georgian CAD/CAM Engineering Center

Platform: Dassault System CATIA V5R12

Dynamical Conflict Checking Strategy

- Two type of conflicts where considering Clashes and Clearances
- Dynamical conflict checking is carring out separatly for each segment of EC toroid (ECT) lifting path
- Cases, when the clearance between the moving ECT and the estimated environment arround, was less than 1000mm, was not considered in detaild

ECT lifting was analysed separatly for:

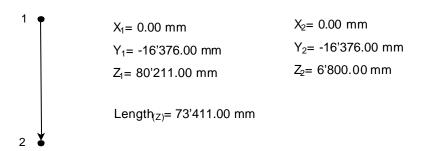

- 1. Warm Structure
- 2. Cavern Civil Engineering
- 3. Heating & Ventilation
- 4. Cryogenics
- 5. HO Structure
- 6. HS Structure
- 7. Trucks in Access Position
- 8. Platforms
- 9. Barrel Brackets & Rails
- 10. Muon Chambers
- 11. Services for Extended Calorimeter
- 12. Services for Muon Spectrometer
- 13. Vacuum Vesels

Predefined Lifting Path of EC Toroid

ECT lifting path consists of 3 support points where center of ECT have to be moved. Coordinats are mesured according to origin point in Z0. In first point of movement center of ECT is coinsidence with the ground floor of SCX1. In this position X=0mm; Y=-16'376.00mm; Z=80'211.00mm. Coordinates of all support points of ECT Lifting path are presented in table 1.

Table 1

| Points | X | Y | Z |
|--------|-----|--------------|-------------|
| 1 | 0mm | -16'376.00mm | 80'211.00mm |
| 2 | 0mm | -16'376.00mm | 6'800.00mm |
| 3 | 0mm | -15'976.00mm | 6'800.00mm |
| 4 | 0mm | -15'976.00mm | 0.00mm |

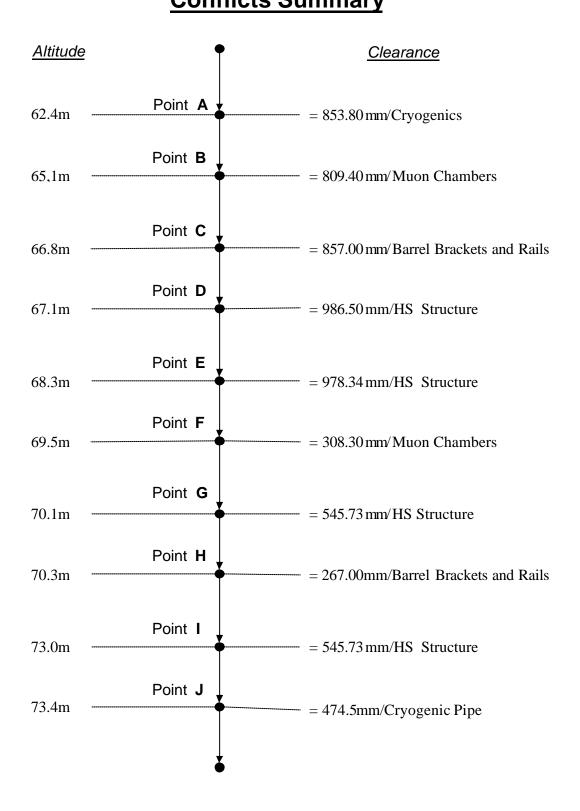

Picture 1

Table 2

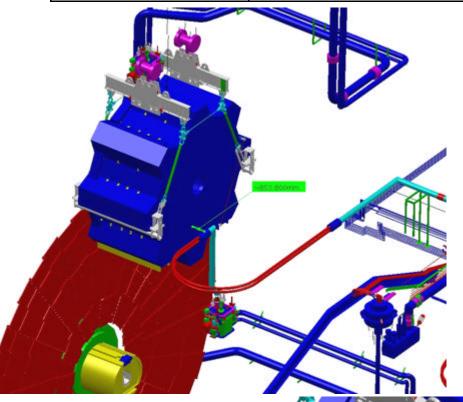

| More then 1000mm | | Less then 1000m | m |
|---------------------------|----------------|-------------------------|---------------|
| Environment | Clearance (mm) | Environment | Clearance(mm) |
| WarmStructure | | • Cryogenics | 474.5 |
| Civil Engineering | 1'135.00 | • Muon Chambers | 308.30 |
| • Heating & Ventilation | 1'462.00 | Barrel Brackets & Rails | 267.00 |
| • HO Structure | | HS Structure | 545.73 |
| • Access Structure | 1'200.00 | | |
| Services of Ext. Calorim. | 2'197.00 | | |
| • Vacuum Vessels | 1'142.00 | | |
| | | | |

Segment #1: Movement from point 1 to point 2 Conflicts Summary

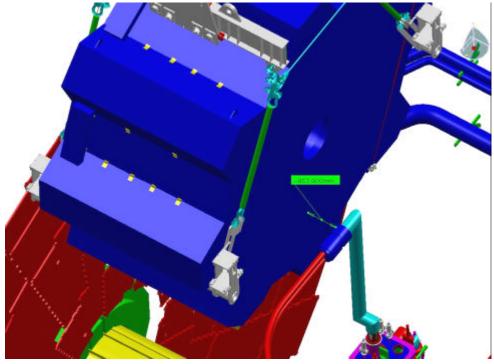

Point A: Altitude 62.4m Side A / US15

| Moving Object | Environment | Clearance | Status |
|---------------|----------------|-----------|----------------|
| EC Troid | Cryogenic Pipe | 853.8mm | Not Considered |

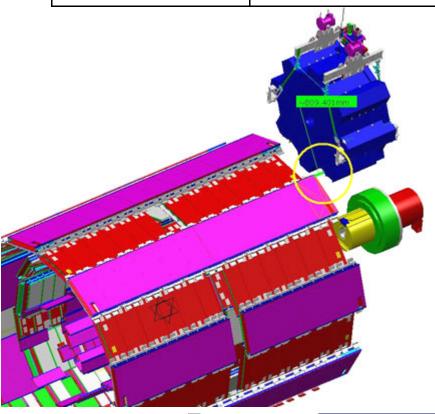

X=0.00mm Y=-16'376.00mm Z=17'798.00mm

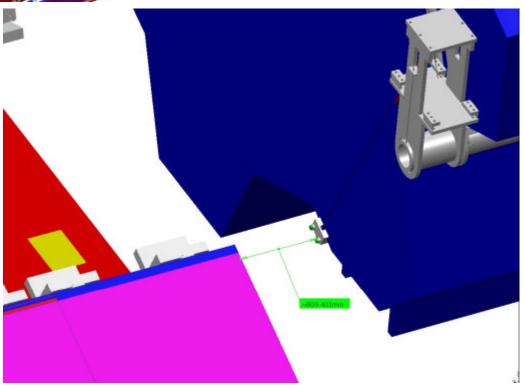

Point B: Altitude 65.1m Side A / US15

| Moving Object | Environment | Clearance | Status |
|---------------|---------------|-----------|----------------|
| EC Troid | Muon Chambers | 809.4mm | Not Considered |

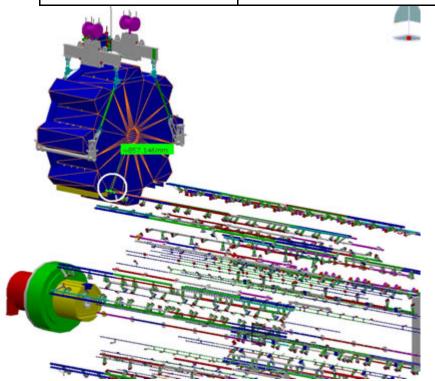

X=0.00mm Y=-16'376.00mm Z=15'145.00mm

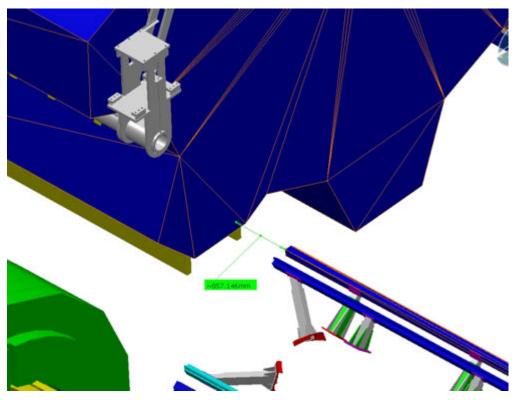

Point C: Altitude 66.8m Side A / US15

| | Moving Object | Environment | Clearance | Status |
|---|---------------|-------------------------|-----------|----------------|
| Ī | EC Troid | Barrel Brackets & Rails | 857.00mm | Not Considered |

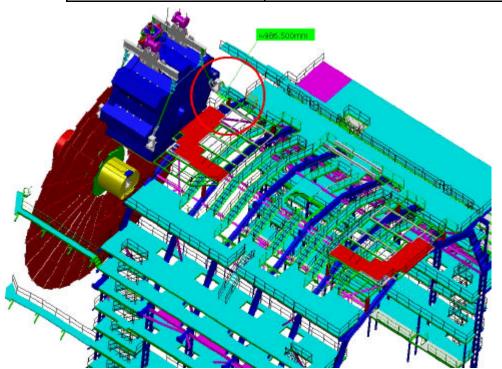

X=0.00mm Y=-16'376.00mm Z=13'400.00mm

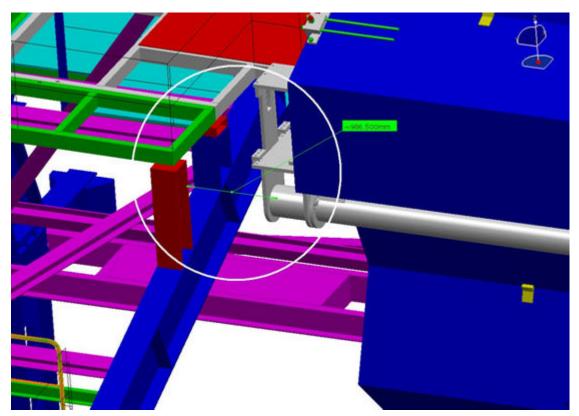

Point D: Altitude 67.1m Side A / USA15

| Moving Object | Environment | Clearance | Status |
|---------------|--------------|-----------|----------------|
| EC Troid | HS Structure | 986.50mm | Not Considered |

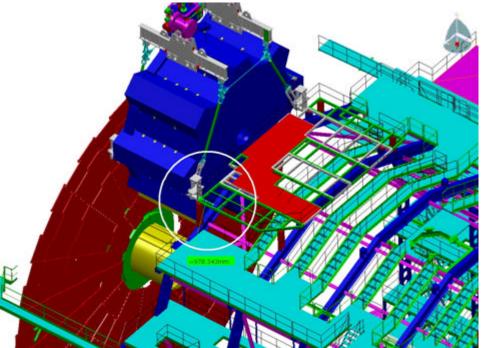

X=0.00mm Y=-16'376.00mm Z=13'090.00mm

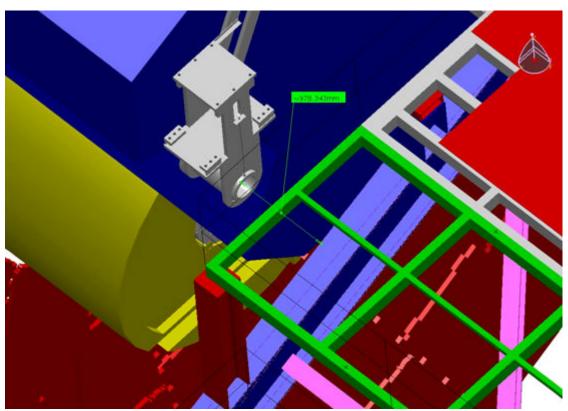

Point E: Altitude 68.3m Side A / US15

| Moving Object | Environment | Clearance | Status |
|---------------|--------------|-----------|----------------|
| EC Troid | HS Structure | 978.34mm | Not Considered |

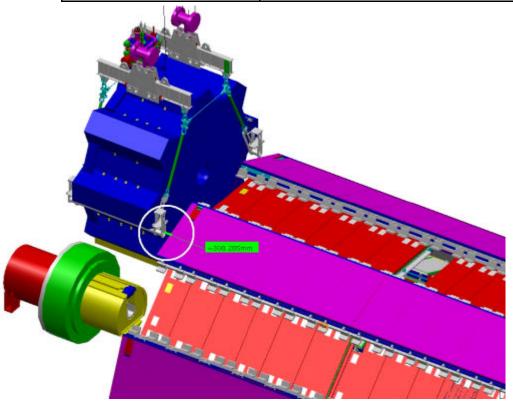

X=0.00mm Y=-16'376.00mm Z=11'890.00mm

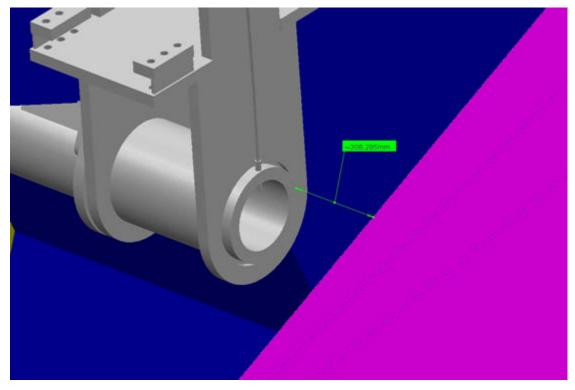

Point F: Altitude 69.5m Side A / US15

| Moving Object | Environment | Clearance | Status |
|---------------|---------------|-----------|----------------|
| EC Troid | Muon Chambers | 308.30mm | Not Considered |

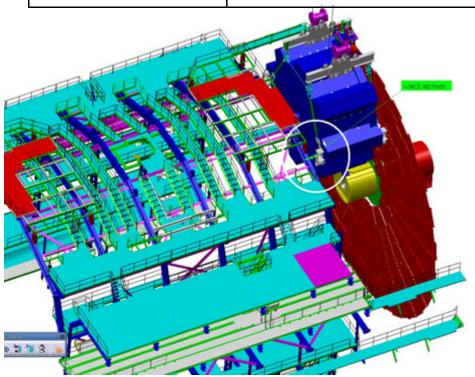

X=0.00mm Y=-16'376.00mm Z=10'745.00mm

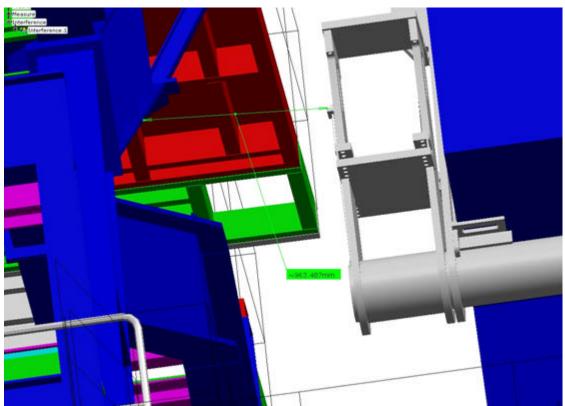

Point G: Altitude 70.1m Side A / USA15

| Moving Object | Environment | Clearance | Status |
|---------------|--------------|-----------|----------------|
| EC Troid | HS Structure | 963.50mm | Not Considered |

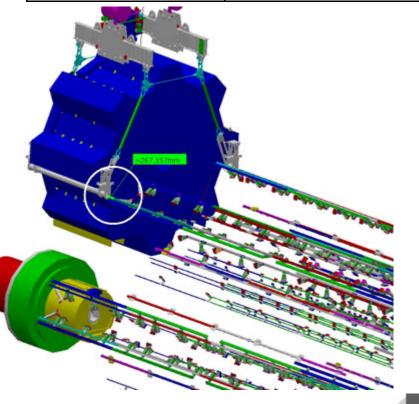

X=0.00m m Y=-16'376.00mm Z=10'090.00mm

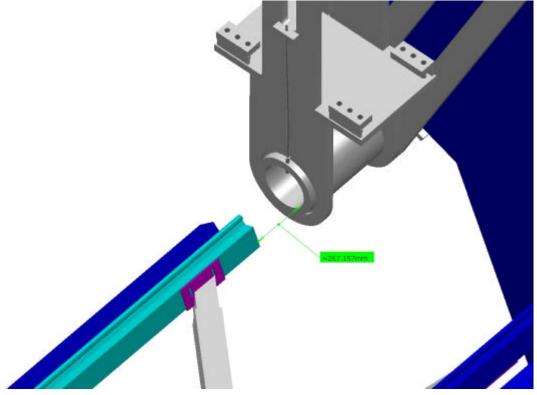

Point H: Altitude 70.3m Side A / USA15

| Moving Object | Environment | Clearance | Status |
|---------------|-------------------------|-----------|----------------|
| EC Troid | Barrel Brackets & Rails | 267.00mm | Not Considered |

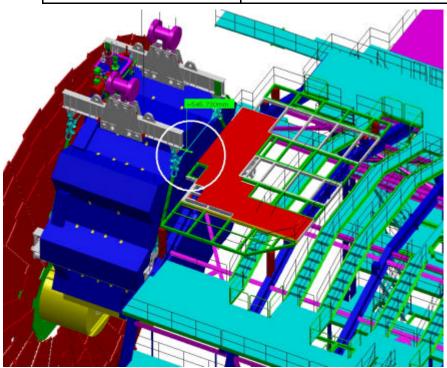

X=0.00mm Y=-16'376.00mm Z=9'900.00mm

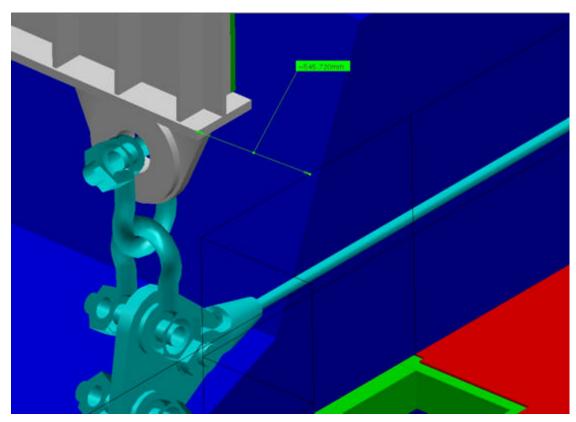

Point I: Altitude 73.0m Side A / USA15

| Moving Object | Environment | Clearance | Status |
|---------------|--------------|-----------|----------------|
| EC Troid | HS Structure | 545.73mm | Not Considered |

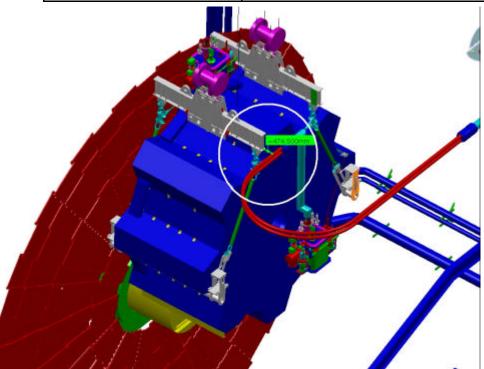

X=0.00mm Y=-16'376.00mm Z=7'300.00mm

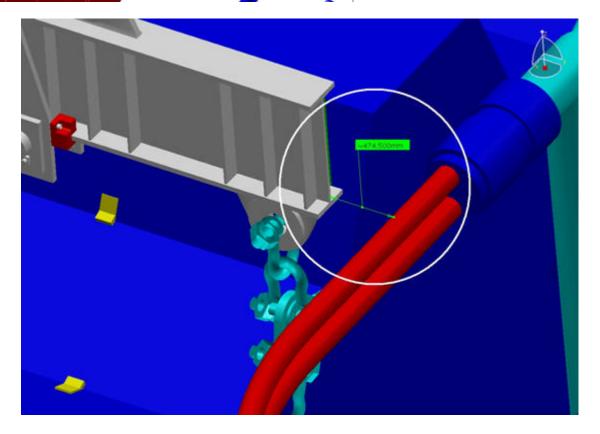

Point J: Altitude 73.4m Side A / USA15

| Moving Object | Environment | Clearance | Status |
|---------------|----------------|-----------|----------------|
| EC Troid | Cryogenic Pipe | 474.50mm | Not Considered |

X=0.00mm Y=-16'376.00mm Z=6'800.00mm

 $Length_{(Y)} = 400.00 \text{ mm}$

Picture 2

Table 3

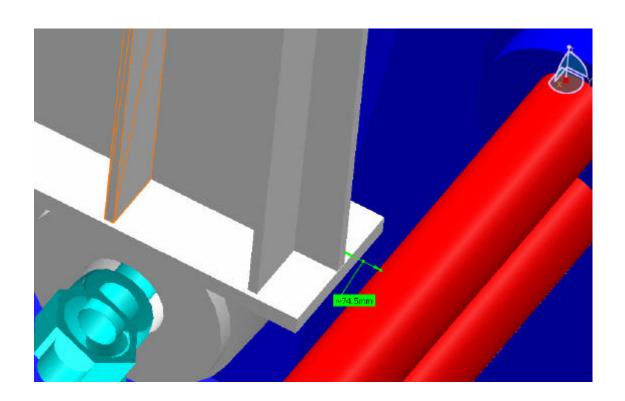

| Grouping Environment by the Clearance | | | | |
|---------------------------------------|------------------|-----------------------------|---------------|--|
| More then 1000mm | More then 1000mm | | | |
| Environment | Clearance (mm) | Environment | Clearance(mm) | |
| Warm Structure | 1'911.00 | Cryogenic pipe | 74.50 | |
| Heating & Ventilation | | HS Structure | 145.00 | |
| HO Structure | | • Access Structure | 800.00 | |
| Services of Ext. Calorim. | | • Barrel Brachets and Rails | 209.00 | |
| Vacuum Vessels | | • Muon Chambers | 233.70 | |
| | | • Services for Muon Spectr. | 496.00 | |
| | | | | |
| | | | | |
| | | | | |

Segment #3: Movement from point 3 to point 4 Conflicts Summary

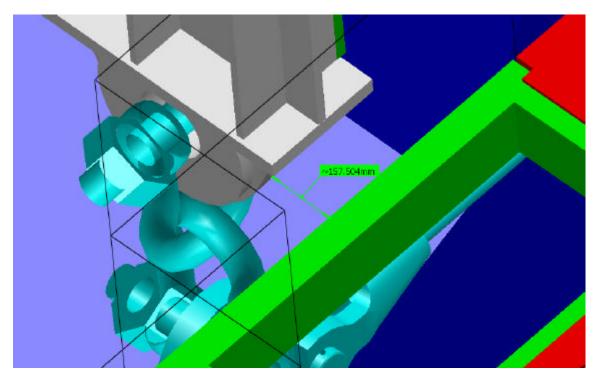

Point A: Altitude 73.8m Side A / US15

| Moving Object | Environment | Clearance | Status |
|---------------|--------------|-----------|----------------|
| EC Troid | HS Structure | 157.50mm | Not Considered |

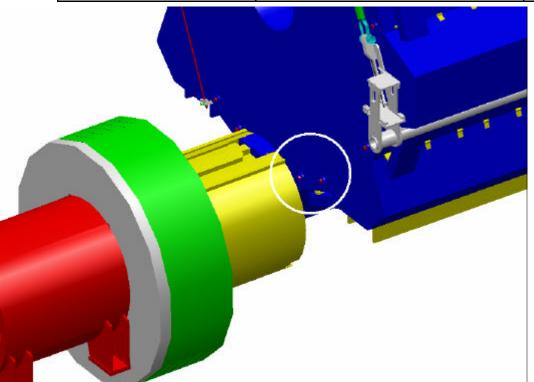

X=0.00mm Y=-15'976.00mm Z=6'370.00mm

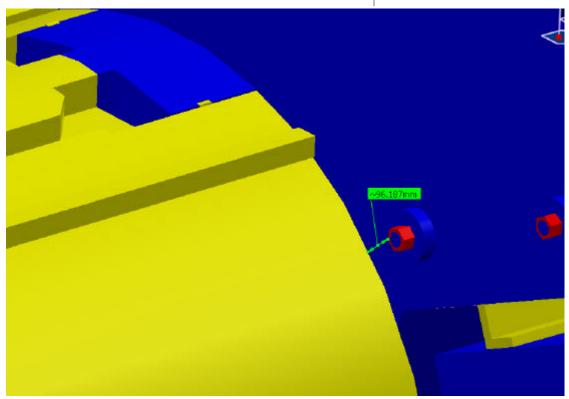

Point B: Altitude 75.4m Side A / US15

| Moving Object | Environment | Clearance | Status |
|---------------|---------------|-----------|----------------|
| EC Troid | TX1S Sheildin | 96.20mm | Not Considered |

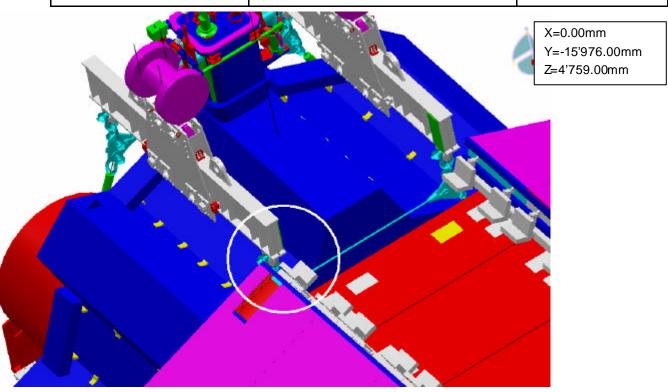

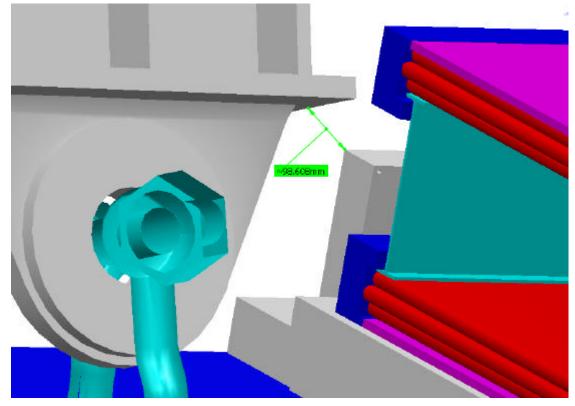

X=0.00mm Y=-15'976.00mm Z=4'779.00mm

Point C: Altitude 75.5m Side A / US15

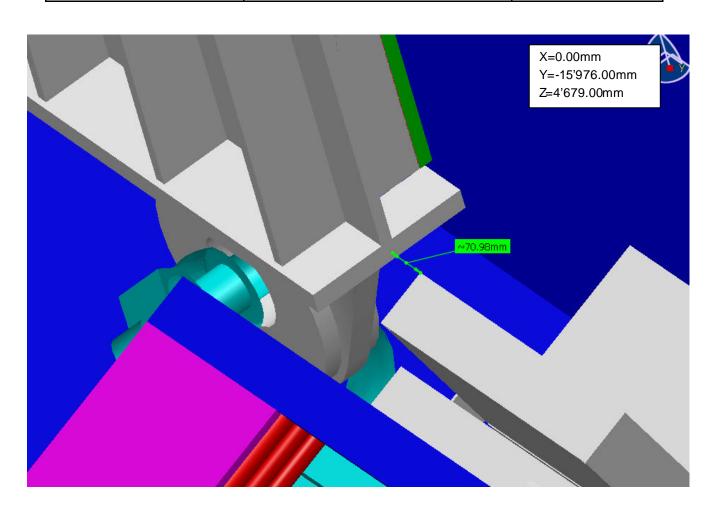

| Moving Object | Environment | Clearance | Status |
|---------------|---------------|-----------|----------------|
| EC Troid | Muon Chambers | 98.00mm | Not Considered |

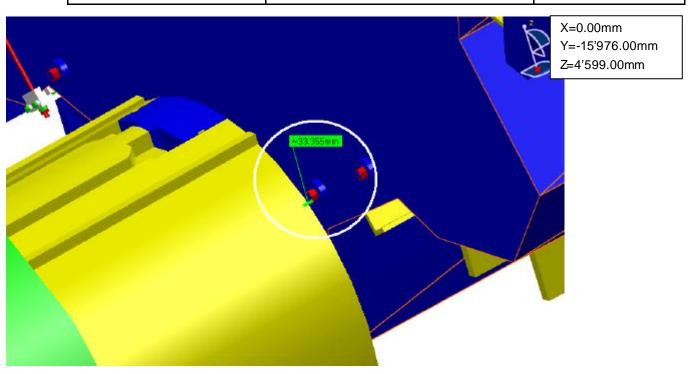

Point D: Altitude 75.5m Side A / US15

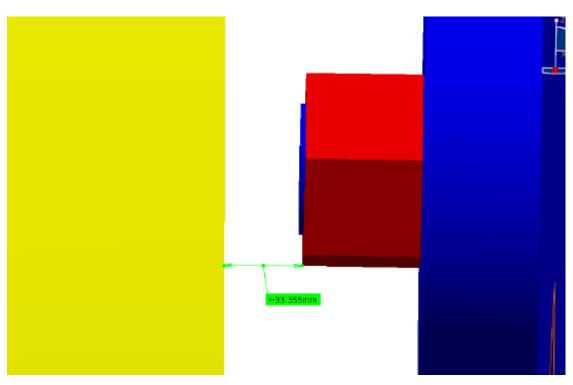

| Moving Object | Environment | Clearance | Status |
|---------------|---------------|-----------|----------------|
| EC Troid | Muon Chambers | 71.00mm | Not Considered |

Point E: Altitude 75.6m Side A / US15

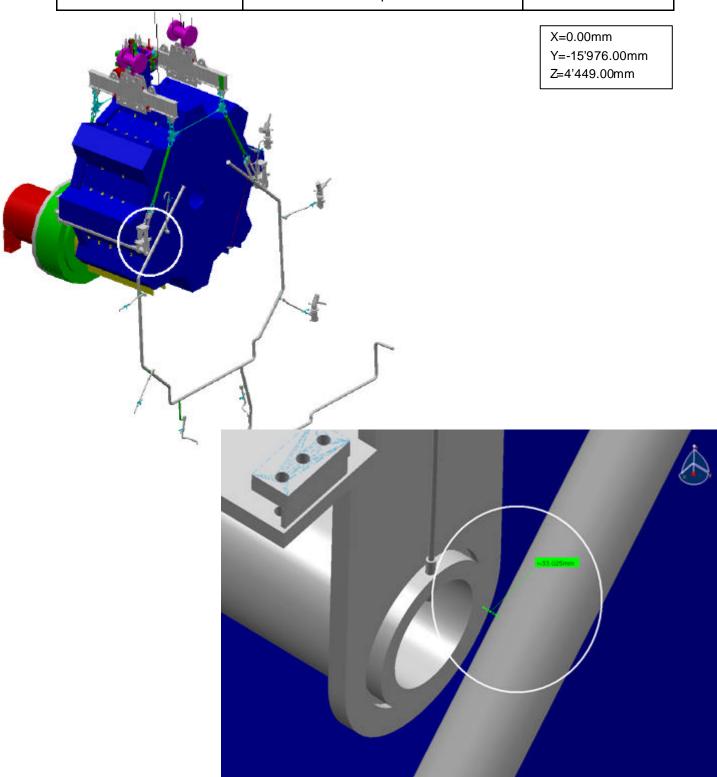

| Moving Object | Environment | Clearance | Status |
|---------------|----------------|-----------|----------------|
| EC Troid | TX1S Sheilding | 33.40mm | Not Considered |

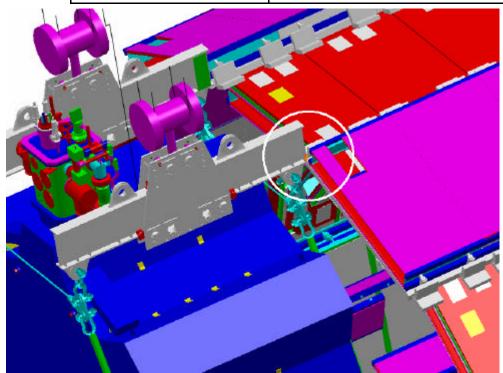

Point F: Altitude 75.8m Side A / US15

| Moving Object | Environment | Clearance | Status |
|---------------|---------------------------|-----------|----------------|
| EC Troid | Services for Muon Spectr. | 33.00mm | Not Considered |

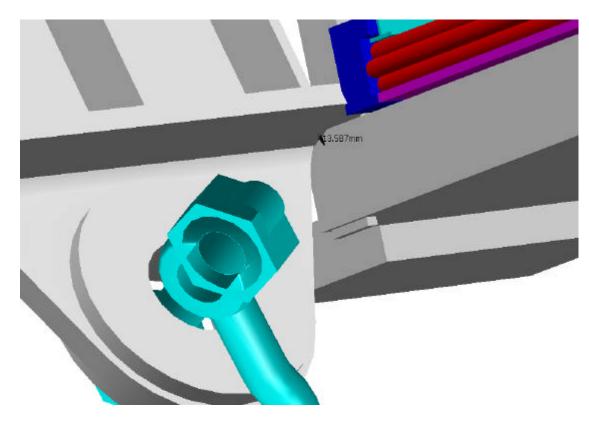

Point G: Altitude 75.8m Side A / US15

| Moving Object | Environment | Clearance | Status |
|---------------|---------------|-----------|----------------|
| EC Troid | Muon Chambers | CLASH | Not Considered |

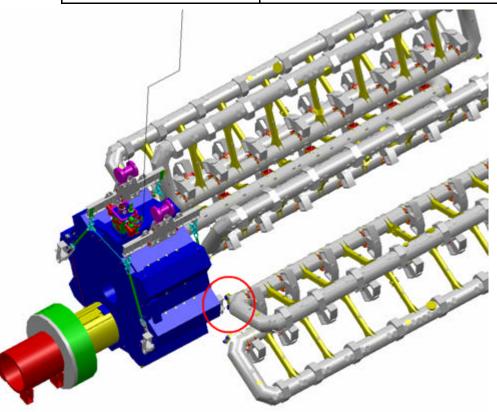

X=0.00mm Y=-15'976.00mm Z=4'404.00mm

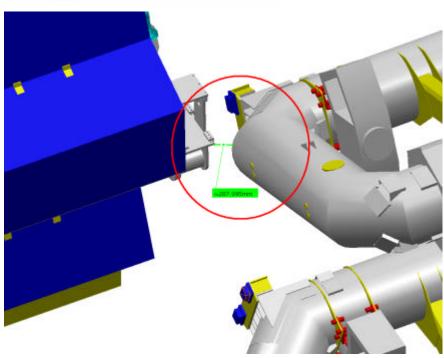

Point H: Altitude 77.4m Side A / US15

| Moving Object | Environment | Clearance | Status |
|---------------|----------------|-----------|----------------|
| EC Troid | Vacuum Vessels | 288.00mm | Not Considered |

X=0.00mm Y=-15'976.00mm Z=2'799.00mm

Conclusions

Predefined Path of ECT lifting can not be realized without major modifications of elements as follow:

Muon Chambers - to remove CLASH on the altitude 75.8m. See Point G,

Segment#3 for details

- To remove clearance 71.00mm on the altitude 75.5m. See

Point D, Segment#3 for details

Cryogenic Pipe - to remove clearance 74.50mm on the altitude 73.4m. See

Point A, Segment#2 for details

Most tight case exists on the altitude 75.6/75.8m where extremely small clearances on the opposite side of ECT are detected - with TX1S_Sheilding/33.40mm (Point E, Segment#3) and Service_pipe_for_Muon_Spectrometer/33.00mm (Point F, Segment#3)
